CAREER OBJECTIVE

Associate Software Engineer and Automation Engineer with 1 year of practical experience in developing web applications, websites, landing pages, business automation workflows, AI agents, API integrations, and database-connected solutions. Skilled in frontend technologies, backend/API integration, automation tools, and third-party platform integrations, with strong hands-on experience in n8n-based workflow automation. Seeking a challenging role in a growth-oriented organization where I can contribute to scalable software solutions, automate business operations, and continue developing into a versatile full-stack and automation-focused engineer.

Technical Skills

- **Programming Languages:** Python, JavaScript, SQL
- **Frontend Development:** HTML, CSS, Tailwind CSS, React.js, Next.js, React Native
- **Automation & Workflow Tools:** n8n, Make.com, Zapier, webhooks
- **Backend & API Integration:** Node.js, Express.js, REST APIs, third-party API integrations
- **Databases & Backend Services:** MySQL, PostgreSQL, MongoDB, Supabase
- **CMS & E-commerce Integrations:** Payload CMS, Shopify, WordPress, Zoho CRM
- **Developer Tools:** Git, GitHub, VS Code, Android Studio

Projects

1. Company Website — Business Website

- Designed and developed a responsive company website with modern UI sections for services, industries, company information, and contact details.
- Created landing pages and reusable frontend components using React.js, Next.js, and Tailwind CSS.
- Implemented responsive layouts optimized for desktop, tablet, and mobile screens.
- Integrated contact forms, business inquiry flows, and third-party tools where required.
- Focused on clean UI, professional branding, performance, and user-friendly navigation.

2. Auto Social AI — AI Automation Web App

- Built an AI-powered social media automation web application for managing content creation and workflow automation.
- Developed responsive frontend screens, dashboards, and user interface components.
- Integrated APIs, database services, and automation workflows for connected business operations.
- Used n8n to create automation flows and AI-agent-based processes.
- Worked on frontend development, API integration, database connectivity, and automation logic.

3. Personal Portfolio Website

Built my own portfolio website using HTML, CSS, and JavaScript to showcase all my frontend projects.

- Designed with smooth transitions, responsive layout, and modern UI elements.
- Included project previews, social links, and a contact form for visitor

4. Hand Gesture Animation Controller

- Built a real-time hand gesture detection system using Python and webcam input.
- Implemented hand movement tracking to recognize gestures and trigger screen-based animations.
- Integrated gesture-controlled typing/output functionality on the display.
- Used OpenCV and computer vision techniques for real-time video processing.
- Gained practical experience in camera integration, hand tracking, gesture recognition, and interaction

EDUCATION

University of Okara **(2025 - 2029)**

Bachelor of Science in Artificial Intelligence

ADDITIONAL SKILLS

- Problem-solving & logical thinking
- Basic knowledge of Machine Learning concepts
- Hands-on experience with Python libraries (e.g., OpenCV,)
- Backend development & UI design fundamentals
